Specialist Lighting

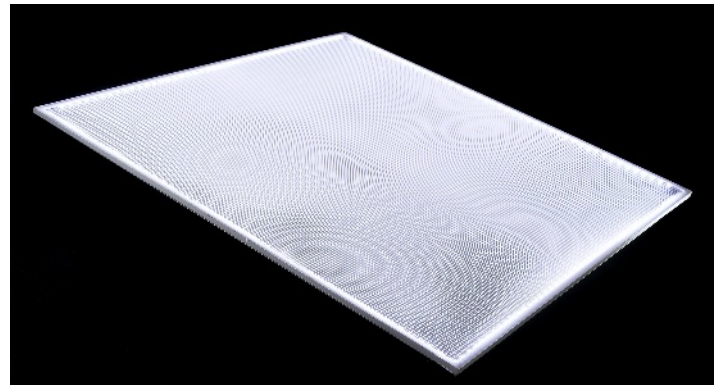

Monolith's light up with Trueform

Trueform are designers, manufacturers, installers and integrators of Intelligent Transport Systems. Established in 1977, Trueform have been successfully transforming the waiting experience for travellers by advanced technology solutions for public transport.

Zeta Specialist Lighting has supplied Trueform over 500 sets of bespoke **Light Guide Panels** for incorporating into street monoliths in the UK. Zeta has also worked closely on; The London Cycle Hire Scheme, Legible Leeds, Legible Southampton and Glasgow Monoliths.

Zeta offer a unique design that allows the customer to choose their desired lighting level, overall size, colour temperature and even an option to power by solar. The products have been proven to be **reliable, robust** and **efficient** whilst offering an excellent **even illumination** across the map/advertisement or information panel.

Zeta's Managing Director Phil Shadbolt said *"These types of projects are perfect for Zeta allowing us to provide an innovative solution through the detailed design services that we can offer at Zeta. The Light Guide Panel combined with our experience in Solar, offers a perfect solution for low powered on-street illumination"*
